# DARSHANA AKADKAR

## Software Development Engineer

### ABOUT ME

Experienced in building enterprise web apps using .NET, React.js, and AWS, driving end-to-end SDLC with a TDD approach and client-focused solutions.

### WORK EXPERIENCE

#### Publicis sapient: (Aug 2025 - present) Senior Associate Technology L1

**Domain** - .NET Core 8, C#, API gateway, DynamoDB, Microservices, Lambda, cloudwatch.

- Recently onboarded; currently involved in understanding existing systems, tools, and architecture.
- Contributing to internal discussions, environment setup, and POC development for upcoming modules.
- Exploring performance optimization, cloud deployment strategies, TDD-based approach

#### Accelya solutions pvt.ltd : (Oct 2023 - Aug 2025) SDE 2

**Contributed to the successful execution of the incubation unit's innovation mission in airline retailing.**

**Client** - Airlines like Qantas, Aegean

**Domain** - .NET Core 8, C#, API gateway, DynamoDB, Microservices, Lambda, cloudwatch.

**FLX - Direct Project** : Product that acts as a direct channel for airlines, serving as a wrapper over existing NDC servers. Contributed to the MVP from its inception, implementing services such as offers, carts, orders, locations, and configuration, each tailored to individual airlines. Used microservices architecture to ensure scalability and maintainability. Gained hands-on experience in microservices, serverless architectures, and backend API development, with future plans to integrate UI development for enhanced user experience.

**Client** - Airlines like Qantas, Aegean, Lufthansa

**Domain** - .NET Core 8, C#, API gateway, Lambda, DynamoDB, Microservices, Next.js, React Js.

**Product Catalogue Development** : The development of a new Product Catalogue for airlines to display services such as seats, baggage, and bookings, replacing the outdated FLX format with a more user-friendly solution. Played a key role in developing the MVP from the ground up, contributing to both backend and frontend development with a focus on delivering a seamless user experience, performance optimization, and robust system integration using AWS services. The new catalogue design enhanced service visibility and streamlined airline operations.

**Client** - Accelya Internal project

**Domain** - React.js, HTML, CSS, Next.js.

**Falcon Design System (FDS)** : Contributed to the development of the Falcon Design System to standardize UI components and ensure a consistent design language across all company products. This initiative enhanced brand consistency, streamlined the design process, and improved overall efficiency. Built reusable React components that reduced development time by 30%.

#### E-Zest solutions pvt.ltd : (Feb 2022 - Oct 2023) Software Engineer

**Client** - World Health Organization

**Domain** - .NET Core 3.1, C#, Entity Framework, Web API, MS SQL Server, Azure key vault.

**WHO Representative Portal** : Developed a role-based portal for WHO representatives with modules for documentation, user management, and notifications. Implemented access control for roles like Global Admin and Regional Representative, ensuring appropriate section-level visibility. Achieved a 25% reduction in response latency by optimizing Entity Framework and Linq queries.

**Client** - World Health Organization

**Domain** - .NET Core Framework, Web API, D3.js, C#

**WHO Data Portal** : Developed an application for WHO representatives to access country-specific disease data, organized by year. The portal presents the data in various chart formats, supports multiple languages for broader accessibility.

#### Excellon solutions pvt.ltd : (Sep 2018 - Dec 2019) software Developer

**Client** - Bajaj Automobiles (Global)

**Domain** - Dot Net Core, C#, Entity Framework, Web API, MS SQL Server.

It is a **client-server application** (B2B), designed & deployed for all dealer network across globe for Bajaj automobiles. This application is for all the Business units of Bajaj i.e. Motorbike, pro-bike (KTM), 3 wheeler and Urbanite. It was designed fully automated process of sales & service.

**Client** - Excellon Software

**Domain** - Dot Net Core, C#, Entity Framework, Web API, MS SQL Server.

It is an **Excellon software**, designed to enhance previous Excellon 5 Framework. It was designed to expand overseas business and to expand business to multiple sectors.

### SKILLS

#### Development Technologies

C#, .NET core 8, React.js, Entity Framework, Next.js, Microservices, Serverless Architecture, Xunit and Jest for unit tests.

#### Databases

Sql, NoSql - Dynamodb

#### Cloud Computing

AWS - Lambda Function, API Gateway, EventBridge, DynamoDB, CloudFront, CloudWatch, VPC, S3, Cognito etc.

#### DevOps/CICD Tools

SonarQube, Gitlab, Terraform, JFrog

#### Core Competencies

Technical Analysis & Maintenance, Software Development Life Cycle, Problem Solving, Agile, RCA / Troubleshooting, Collaborator, Responsive UI, Asynchronous programming, Software documentation, Restful services, SOLID principles

### CERTIFICATIONS

- Ms Certified : Azure fundamentals
- AWS cloud Practitioner certificate

### EDUCATION

#### MODERN EDUCATION SOCIETY'S COLLEGE OF ENGINEERING, PUNE.

BE Computer Science - 2018

#### RESIDENTIAL COLLEGE, A. Nagar

Class XII, HSC, 2014

#### BFHS, A. Nagar

High School - 2012
